

# Angular V.17+

## STANDALONE PROJECTS

CLI

```
npx -p @angular/cli@latest ng new my-app -s -t -S
```

### 1 App Bootstrap

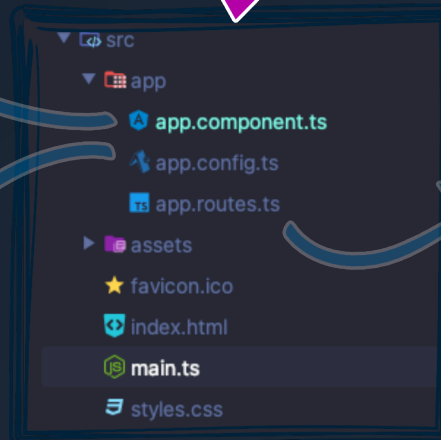

```
bootstrapApplication(AppComponent, appConfig)
```

### 2 Root Component

```
@Component({
  selector: 'app-root',
  standalone: true,
  template: '...',
  styles: [],
})
export class AppComponent {}
```

### 3 App Configuration

```
export const appConfig: ApplicationConfig = {
  providers: [provideRouter(routes)]
};
```

### 4 Router Configuration

```
import { Routes } from '@angular/router';

export const routes: Routes = [
  // Without default export
  {
    path: 'page1',
    loadComponent: () => import('./page1.component')
      .then(c => c.PageComponent)
  },
  // With default export
  {
    path: 'page2',
    loadComponent: () => import('./page2.component')
  },
];
```

### 5 Routed Component

```
@Component({
  selector: 'app-page2',
  standalone: true,
  template: `...`,
})
export default class Page2Component {}
```
